

Dear parents and guardians

Due to the latest order of the state government of Lower Saxony, we have to inform you about the following requirements:

Visiting arrangements

- Only one fixed reference person per patient is allowed in the building; this person receives a personalized access card or name bracelet.
- In special medical emergencies, an individual solution can be provided.
- At the entrance control, please show your personalized access card and identify yourself with your ID card or another official document.
- A later change of the reference person is not possible.
- All other persons - including siblings - can NOT be admitted due to the distance and spacing rules, except for infants to be breastfed.
- Every person except patients must fill out a pink documentation sheet at the entrance.

Mask obligation

- All visitors are required to wear a medical mouth-nose protection or FFP2 mask permanently inside the hospital, also in the patient rooms!
- The mask can only be removed for sleeping and eating.
- Cloth masks, scarves and shawls are not permitted!

Please observe the general hygiene rules. Thank you very much!
